

Product Oversight and Governance

Summary:

Employment Dispute Protection

Overview of the product oversight and governance process

Product oversight and governance refers to the systems and controls that the manufacturing firms have in place to design, approve, market, and manage products through their lifecycle.

Good product governance and oversight results in products that meet the needs, objectives, interests, and characteristics of the target markets, being sold through appropriate distribution channels, delivering appropriate customer outcomes, and providing products that provide fair value to those customers.

Irwell fully supports this aim.

Product Approval Process

The purpose of this process is to ensure the product puts the needs of the customers first, to ensure they get a product that they can confidently expect to meet their needs at the point of sale and throughout the life of their policy and provides fair value to the customer throughout this time.

Irwell undertakes a product risk assessment for each newly developed product and where there are significant changes to an existing product. In addition, its product oversight and governance process is followed to ensure that products remain suitable for the target market.

Numerous factors are considered during this process that consider such aspects as the suitability of, and risks associated with, the distribution chain, product features and benefits, the claims process and the level and detail of complaints.

Situations that may conflict to the detriment of the customer.

Irwell has not identified any specific circumstances in relation to this product that conflict with the best interests of the customer. Below are outlined some examples of circumstances that could be considered a conflict:

- Sales incentives that incentivise sales rather than ensuring the most appropriate products are provided.
- Claims being handled by underwriters, or oversight of the claims department being provided by underwriting managers.
- Volume-based commissions for producing brokers.
- Acting on the brokers' instructions in respect of the price to charge for a risk.
- Net rating the product with no clearly documented pricing strategy.

Fair Value Assessment

Based on all of the information available, Irwell has concluded that this product does provide fair value to customers.
